- **Length & Width tolerance:** +/- 2 mm
- **Thickness tolerance:** +/- 0,2 mm
- **Glue:** D4, both sides sanded Grit 180 - 240
- **Quality:** AB, AC, BC
- **Common Thickness:** 15/18/20/26/38 mm
- **Common Width:** 400/600/650/1220 mm
- **Common Length:** 800/1200/1830/2500 mm

## I FINGER JOINT LAMINATED BOARD

Finger Joint Wood board are products jointed by plantation timber being kilndried and termites-treated. On the modern and advanced technology production lines, short wooden sticks having same width but different length are jointed into the bars of equal length, and then jointed parallel depending on requirements of the size of the panel width.

TOP FINGER

SIDE FINGER

## The Difference Between Grades:

### — A SIDE:

Is absolutely perfect, lamellas are of even color, not allowed knots, rot, cracks, holes, black lines and free of natural/ resulting from drying/ technical defects.

### — B SIDE:

Live knots allowed with diameter not exceeding 15mm, spread evenly. Dead knots allowed with diameter not exceeding 20mm and no heartwood; No dark imprints due to surface treatment.

### — C SIDE:

All types of defects, holes repaired with putty or wood, even surface. Occasionally unlimited size sound knots and black knots allowed with diameter not exceeding 25mm, dead knots are repaired
